

App Creation called: My Life

By Michael Williams

Requirements

- Face Recognition
- Security Questions, if answered wrong your account becomes frozen for a couple of mins
- Smartphone
- Location confirmation, if security questions were answered wrong
- Requires no internet connection to use

How does the app work?

- ❑ The app basically will have all of your important documentation present on to this app so you can keep track of these documents.
- ❑ Many people tend to lose or misplace paper documents as it becomes overwhelming.
- ❑ This app will have every important document you need based on whatever document you log on to the app.
- ❑ This app will help save trees as we will use less paper

Why is this effective?

- This app becomes very effective as many people now would be able to find their documentation when needed quickly and fast.
- Many people would not have to worry about misplacing a document they received from a doctor office.
- App would save the earth from using paper and we would be able to save trees which provide oxygen for us to breathe.

Con't (Why is it effective?)

- Organization

Isn't it not smart to put all of our info on an app?

- Well, realistically we already have a lot of our information already surfacing the internet through different social media apps.
- This My Life app will come in handy as we reduce the use of paper and make our Earth GREEN.
